

Completion of "Specifying Fiber Cement Wall Systems" Approved for 1 AIA HSW/LU, Provider T207

This course will discuss the different options available in fiber cement cladding and how fiber cement can be used to meet project aesthetic, budget, and performance goals. It will also address recent changes to energy and building codes, and how fiber cement cladding can be used in conjunction with exterior continuous insulation systems (CI), as well as attachment strategies and detailing over CI. Finally it will also discuss fire and combustibility testing as it relates to assemblies with fiber cement cladding, and when specific testing is required by the code.

This program is registered with the AIA/CES for continuing professional education; AIA provider # T207.

1 AIA LU/SW credit earned on completion of this program will be reported for participants who provide their AIA number.

Questions related to specific materials, methods, and services will be addressed at the conclusion of this presentation.
